Description:

At The Jewish Hospital — Mercy Health, we're proud of our legacy as the first Jewish hospital in the United States, founded in 1850 to serve the Jewish community of Cincinnati. Yet since the beginning, we've been privileged to welcome and care for people of all faiths. To this day, our doctors, residents, nurses and staff remain focused on delivering compassionate care and the best outcomes for patients and their families.

The Jewish Hospital — Mercy Health was founded in 1850, when a cholera epidemic sickened thousands of Cincinnatians. The Jewish community saw a need to provide care for poor Jews, and founded the first Jewish hospital in the United States. Since its early days, The Jewish Hospital has always welcomed and cared for people of every faith.

The Jewish Hospital's legacy of teaching the next generation of physicians dates back more than 100 years, and today, residents in surgery, medicine, podiatry and pharmacy all train at The Jewish Hospital.

The Jewish Hospital — Mercy Health is located in Kenwood, a Cincinnati suburb that provides convenient access from around the Tri-state.

Our renowned services include the region's first and most comprehensive adult Blood & Marrow Transplant Center; enhanced neurosciences capabilities with our Brain Tumor Center – a partnership with OHC (Oncology Hematology Care), the region's largest oncology practice, and Mayfield Brain & Spine, the region's largest neurosurgical practice – to treat brain tumors; a premier Joint Replacement Center performing nearly 1,000 total joint replacements every year; the region's most experienced mobile mammography program; the Weight Management Center and full-spectrum cardiovascular and emergency services.

We're excited about the progress of our renovation and expansion over the next few years, which contribute to our continuous drive to put our patients, their families and their health care team at the center of it all.
